

Rust Safe

Defense Against Rust

-Rust Safe is a high-performance rust protection water based coating designed for long-term corrosion resistance for all kind of metallic surface. It forms a durable, water-resistant, and chemical-resistant barrier, making it ideal for industrial, automotive, and marine applications.

-It's come in the package of 250ml, 500ml, 1ltr.

APPLICATION

- Surface Preparation: Clean and degrease the metal surface. Remove rust, mill scale, and loose paint by sandblasting or wire brushing.
- Application Methods: Brush, roller, or spray (airless or conventional).
- Mixing: Stir thoroughly before use. Do not thin unless required.
- Recommended Number of Coats: 1-2 coats depending on exposure.

KEY FEATURES

- Long-lasting rust and corrosion resistance
- Fast-drying formulation
- Excellent adhesion to metal surfaces.
- Resists salt spray, chemicals, and water.
- Environmentally safe.

TECHNICAL DATA

Appearance: Cementitious/Gray

Base Type: Acrylic based

Dry Time:(Touch) 20 minutes @ 25°C

Full Cure Time:24 hours

Coverage: 4–5 m² per liter

Film Thickness (Dry)25–30 microns

Temperature Resistance:-20°C to 100°C

Salt Spray Resistance> 500 hours
(ASTMB117)

Shelf Life 24 months (sealed container)
