

Sealant Kit (core cutting)

Sealant Kit(Core Cutting) is a 4-component, 100 % solids, solvent-free, moisture-tolerant, high-modulus, high strength, RESIN & HARDNER with FILLER and SBR. Structural bonding of concrete, masonry, metals, wood, etc. to a maximum glue line of 1/8 inch(3 mm). Grout bolts, dowels, and pins. Seals cracks and around injection ports prior to pressure-injection grouting. Interior, vertical, and overhead repair of concrete as an epoxy mortar binder. As a pick-proof sealant for core cutting holes for pvc and upvc, around windows, doors, lock-ups, useful for sealing concrete and any other metal or plastic etc. inside correctional facilities. There are 4 Components: Resin (200gm, 1Kg), Hardener(100gm, 500gm), Filler(700gm, 2.5Kg), sbr(1ltr, 2ltr).

Commercial Applications
